

RENEWABLE ENERGY OFFSHORE WAVE & TIDE

Marico Marine provide vessel traffic surveys and navigational risk assessment to Offshore Wave and Tidal Energy developers. Marico's Master Mariners, Engineers and Geographers provide a total navigation risk assessment solution of the offshore wave and tide industry, utilising expert judgment, data analysis techniques and specially developed in house software to assess maritime risk to the requirements of the MCA's MGN 371 (M+F).

Extensive knowledge from the ports and the offshore industry, allows Marico to bring this expertise to the new, exciting and dynamic Offshore Wave and Tidal industry.

Capability

- Project Scoping;
- Navigation Assessments for Environmental Statement;
- Navigation Risk Assessment using the FSA process;
- Marine Radar Assessment; and
- Safety Management Systems.

Projects / Clients
